

ENHANCING VET PROFESSIONALS SKILLS FOR E-LEADERSHIP EDUCATION AND TRAINING

eLead is an Erasmus+ KA202 project - Strategic Partnership for the development of innovation in VET Sector. It has officially started in October 2019 and will last for 28 months.

The eLead project intends to create educational material for VET professionals involved in training processes for managers and workers in small and medium enterprises, in order to implement and promote training paths for the acquisition of e-leadership skills.

In this newsletter you will find the project information in a nutshell and the description of the activities carried out so far.

ACTIVITIES CARRIED OUT

Pilot test

PILOT TEST 2: the third outcome of the ELead project is the Massive Open Online Course (MOOC). An online training course for the new High Tech Leader qualification made through an interactive platform.

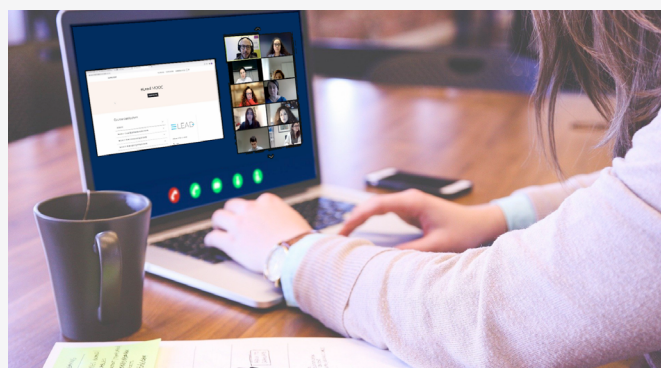

Towards the end of December 2021 and in January 2022, all eLead project partners tested the MOOC by contacting their stakeholders. The analysis concerned specifically n. 10 SMEs and n. 2 VET trainers.

Overall, the MOOC was performed by at least 40 participants from each target country. At the end of the training course, each participant received a certificate of participation with successful completion of the modules.

ELEAD MULTIPLIER EVENT

Last meeting

Several multiplier events were organised in December in all partner countries to present the project results. Each partner provide to organise meetings with stakeholders in all countries. One of the last meetings held was on 25 January 2022 where all partners met in preparation for the final conference.

Final Conference

The conference was organised online on 28 January 2022 with the aim of disseminating all project results. The aim of the final conference was to disseminate the key results of the open access eLead and to create a community that will grow beyond the life of the project through the online platform. A total of 51 participants attended the conference.

NEWSLETTER

number IV - February 2022

THE PROJECT

New technologies, such as ICTs, are a key engine for growth, but they have to be fueled by the ideas of highly-skilled professionals and business leaders.

Nowadays, many European companies, particularly SMEs and start-ups, are often lacking of professionals with the proper skills to put these technologies to effective use, and the risk of wasting their investments and missing key opportunities for growth and competitiveness is high. All across Europe there is a growing need of leaders capable of identifying and designing business models by exploiting key innovation opportunities and by making best use of ICTs.

The project "eLead - Enhancing VET professionals skills for e-leadership education and training" intends to fill this gap by creating educational material for VET professionals involved in training processes for workers and managers in high-tech/digital sector, in order to implement and promote training paths for the acquisition of e-leadership skills.

PARTNERS

eLead activities are implemented by a consortium composed of seven partner organisations from five different European countries : Italy • Belgium • Netherland • Spain • Greece.
