Introduction

This tutorial aims at presenting how to use Thinkific, the online learning platform that the eLead partnership have deicide to adopt for delivering the eLead MOOC.

This tutorial might be helpful for many of you interested in using the eLead MOOC in your professional practice, changing, remixing and adapting the contents you will find in the eLead MOOC for creating a taylor made training path in line with your context and needs.

This tutorial includes all the information you need to create and manage a free MOOC with Thinkific from A to Z. You can choose to read it in its entirety, bookmark it for future reference or simply take a look at the parts that really interest you.

#1 Why create a MOOC and why choose Thinkific

Whether you are a trainer, a teacher, a training provider or simply someone who wants to transfer your knowledge to others, a MOOC is perhaps the best solution, capable of reaching a multitude of users by providing them with a flexible system, adaptable to their time and habits.

Today, creating a MOOC does not require **any special technical knowledge**. As you will discover in point two, you can create and publish a MOOC in minutes and without spending any money. There are a number of solutions that will suit you, but with this guide we would like to focus on using Thinkific for the following reasons:

- First of all, we can tell you that Thinkific is one of the few platforms that allows you to create a MOOC for free by providing you (also for free) hosting space to publish your MOOC and a system to manage your earnings if you intend to sell your course.
- You don't have to download, install or manage anything. All you need is an internet connection and a little patience to learn how to use the interface.

Against this potential, if you want to use the platform free, there are some limitations:

- you can only create one MOOC
- you cannot add more than one admin to collaborate in the creation and management of your MOOC.
- You are some limitation in the design and technical features

The <u>free pricing plan</u> is perfect for someone new to creating a MOOC, a teacher who wants to create a MOOC for their students or anyone who wants to try their hand at creating an online course. As your needs grow, you can easily access additional services and benefits with pricing plans that suit your needs. The free option is a great way to start.

Build painting courses that students love

Create and sell online courses and membership sites under your own brand, and see first-hand the impact teaching online with Thinkific will have on your business

#2 How to create a MOOC with Thinkific

Go to Thinkific.

After creating your account and explored what you can do (there is a small video introducing you on Thinkific), you can start designing your course.

| THINKIFIC Q Get ready to launch 15% | Welcome, Giulio! | MY COURSES |

| | | | | | | | and access the content of this course. For students that are n their Student Dashboard. |

When finished, just save.

Now, you should start customising your site. To do it, you can open the menu "Design your site" on the left bar.

By opening the "Site Builder" app, you can customise contents and design of your pages.

Clicking on "Home page", you should firstly answer the question below. For this example, we chose "only one course" and then click on "Let's go!"

| X Site Builder Vogue | Home Page | Desktop Mobile Fullscreen DH |
|--------------------------------------------------|----------------------------------------------------------------------------|------------------------------|
| ← BACK Home page CD () Page Theme Settings | | ALL COURSES |
| Header Default Sections | Welcome to your home page! How many courses do you plan to launch with? | |
| Banner All products [smart section] | MORE THAN ONE ONLY ONE COURSE | |
| + ADD SECTION | | |

| X Site Builder Vogue | Home Page | × | C Desktop | D Mobile | ע ^א Fullscreen E |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|---|--------------|-------------|--------------------------------|
| BACK Home page Page Theme Settings REDIRECT | | | | | ALL COURSES |
| Header Default Sections II Banner | Make it easier to find your course Use your Home Page Redirect to send customers to your course's sales page auto-magically † | | | | |
| # All products [smart section] + ADD SECTION | GO BACK LET'S GO! | | | | |
| Footer Default | | | | | |

Now, we will focus on the Home Page.

The customisation of the tabs "Home page" and Courses is more than sufficient for users approaching Thinkific for the first time. As you become more experienced, you will be able to set up all the other elements, if needed.

| X Site Builder | Giulio's School | Desktop Mobile Fullscreen DISCARD SAVE |
|----------------------------|------------------------------------------------------------------------------------------------------------|----------------------------------------|
| Pages Theme Settings | % . | ALL COURSES SIGN IN |
| Default pages Custom pages | Banner Your banner contains a hero image with text overlay. You can also add call to action buttons. | |
| SAVE | | HELP |

It is important to highlight the two main areas enabling the customisation of your pages: the "Pages" and "Theme Settings" tabs.

In the "Pages" tab, you can customise the contents and some structural elements, in the "Theme Settings" tab, you can customise the design of your pages.

Our suggestion is to define the contents and structure before ("Pages" Tab) and then the design ("Theme settings" tab).

In the "Theme settings", we suggest you to choose one of the three pre-defined Styles included. They will change the page design in a consistent way. Then it will be easier to set the single design features, if needed.

| × | Site Builder Vogue | | Giulio's School |
|----------|---------------------------------------------|----------------|-----------------------------------------------------------------------------------------------|
| Pa Ma | Pages yles urker anhattan assic | Theim Settings | |
| Sit | e preview refresh | · | Banner |
| Co | lors | | Your banner contains a hero image with text overlay. You can also add call to action buttons. |
| Ту | pography | | |
| Fav | vicon | | CALL TO ACTION |

Now, you can start designing your Home Page. This will include all your information and courses.

You can customise the header, the banner and the Product areas. They are the main 3 areas which will appear on your site. The header includes your logo and all the direct links you want to provide your learners (including the "Sign in" link).

The banner is the central part of your page and should include a description of your main proposal.

The last part includes a description of all your courses on Thinkific.

The very last part is the footer, which usually includes your contacts and social media, copyright notes and other links.

All the changes will be visible in real-time, so that you can explore and evaluate different solutions.

When you have finished don't forget to save the changes.

You can also create single pages for each of your courses. They are used for give to the learners an overview of your course and allow them to enrol. In most of cases if you want to deliver only one course you can focus only to this page. You should click on "Courses" and then on the course you want to create the page for.

| X Site Builder Vogue | Giulio's School |
|------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| ← BACK Courses Pages Theme Settings | |
| Search all courses How to become a school digital leader from sch atch | |
| | Banner |
| | Your banner contains a hero image with text overlay. You can also add call to action buttons. |
| | CALL TO ACTION |
| | |

Here you can customise four main areas: heading, banner, curriculum and footer. The curriculum will be automatically generated based on the chapters and lesson you included in your course and the related features.

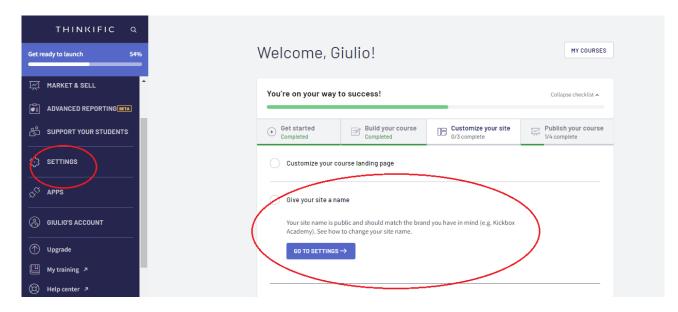

By clicking on the "+ ADD SECTION" button you can include a lot of different sections and contents to your landing page.

When finished, save your settings.

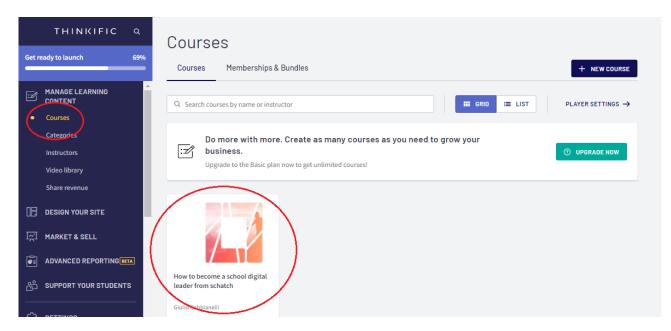

At this point, go to "Settings" and customise your site's details.

In this section, you can define some details about your site, payment method, sign up and other elements.

What you have done so far is sufficient for publishing your first MOOC.

Now, open the "Manage Learning Content" section, go in "Courses" and click on your course.

Click on the tab "Publish" and then on "Publish". Now your students can purchase, enrol in, and access the content of your course.

| × Courses | | | | How to become a school digital leader from schatch 👻 |

| Curriculum | Bulk importer | Settings | Drip | Pricing After purchase Publish |
| | | | | Publish |
| | | | (| Course publish status Draft Students cannot purchase or enroll in this course. For students that are already enrolled, this course will not appear on their Student Dashboard. Pre-order Students can pre-order and enroll in this course, but cannot access its content. For students sooned to big course, a course card will appear in their Student Dashboard with a "Coming soon" label. Published Students can purchase enroll in, and access the content of this course. For students that are enrolled, this course will appear on their Student Dashboard. |

Conclusions

Creating Thinkific courses can be simple or difficult. The difficulty lies in the degree of complexity of the course we want to create. If you want a simple MOOC it will be very easy to achieve your goals. If, on the other hand, you want to create a complex educational path, you will have to apply yourself and study a bit further.

Learning how to use Thinkific does not require technical skills such as programming, it just requires commitment and passion. Try to take this new activity as such, study how it works, and be happy with your successes and in times of difficulty just keep learning.
